University Seminar on Technology in Emergency Care

Title: Technology in Emergency Care: a seminar in the GW University
Symposium Series on Emergency Care and Public Health Preparedness in
American Society

Date / Time: February 21, 2012, 5 PM to 7 PM

Location: Room 405
Marvin Center
The George Washington University
800 21st St., NW
Washington, DC 20052

Description: This 2-hour session will address the implications of the increasing and
diverse use of technology in emergency care in the United States. Following a brief introduction, the topics to be covered include:
- overview and assessment of Emergency Department
technology in use today
- impact of information technology on emergency care
- coordination of care post-visit and in dispersed non-hospital settings
- implications for emergency medicine training

This session will be geared to a wide variety of stakeholders with an interest in emergency care, including technology industry professionals, health care providers, medical school administrators, health policy professionals, and students and trainees in these areas. This is the second in a series of University Seminars on “Emergency Care and Public Health Preparedness in American Society” which will be held from the fall of 2011 until the fall of 2012.

Wine and cheese will be served.
